Kelngang ilagay yung prices ng EXTRAS at SIZES, kaya ko naman na ti, kase I didiplay lang, pero yung data kase na price nalilito ako.

Gawing required lahat ng input.

Upload receipt image – make it accept only jpeg or jpg.

Remove amount – make the amount come from the total amount. Bale yung masasave nalang na amount is yung total amount mismo, wala naman ng sense yung mag lalagay pa ng amount.

Tanggalin ang SIZE na input kung ang pinili ay "AddOns"

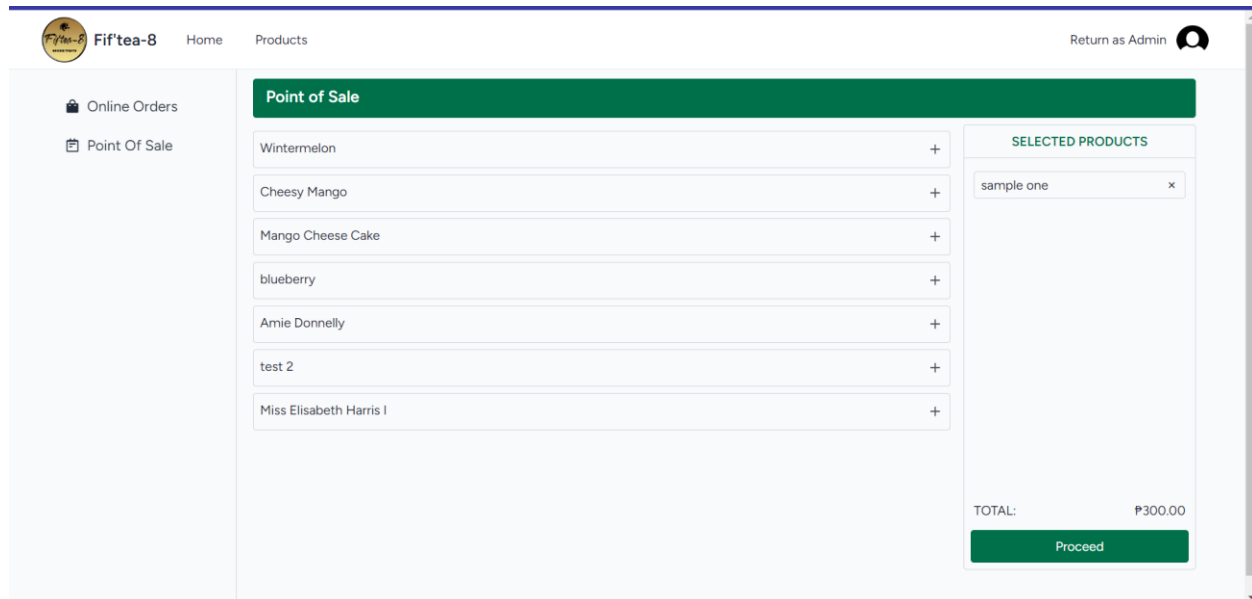

Gawing REQUIRED lahat ng input.

Ayusin ang transaction ayaw gumana.

Gawing unique yung name para isang product lang ang malalagy hindi na mag dodoble.

Dapat hindi nawawala yung product sa list pag na select na siya

Gawing box ang products with price, image, name, (ako na gagawa ng design basta yung data na price, image at name naka ready na)

Sa selected products gawing mukhang resibo and isura with quantity – name – unit price – total price (ako na gagawa ng design ng mukhang resibo basta yung data na quantity – name – unit price – total price each item na selected ay ready na)

Lagyan ng filtering by category, katulad ng nasa products page an may filtering ng kung shomai or milktea or kung ano pa yun.

Dapat bago makapag order ay nae edit muna kung anong size, sugar level at extras tulad ng nasa oder product page. (pag usapan pa natin kung ano magiging approach natin dito)
